

NMTC

New Markets Tax Credit

With a new allocation of \$50 Million in 2023, our largest award to-date, Partners for the Common Good (Partners) is ready to support high impact community facility projects!

Community Services

Projects that provide critical human, social, and community services to low-income people, such as free or low-cost legal assistance, healthy food access, and training to emerging entrepreneurs.

What we do:

Our NMTC product addresses the financing problems that many of our borrowers face. These borrowers, often BIPOC-led organizations, cannot obtain the capital needed from traditional sources. Most of their projects have tight margins with limited cash flow. Our NMTC product addresses these financing problems.

Healthcare

Health clinics that provide integrative primary and preventive services to residents of Medically Underserved Areas.

Education

Educational facilities for today's youth. Vocational training facilities that prepare low-income, comparatively under-skilled individuals for quality jobs.
